Bangalore, India | +91 70199 56682 | naikvasuki413@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analytics undergraduate at CMR University (CGPA: **8.83**/10.00) skilled in SQL, Python, Power BI, and statistical modeling through end-to-end analytics projects involving KPI diagnostics, ETL pipelines, and predictive modeling. Co-authored ML research on telecom churn prediction (under review at **CICON 2026**). Seeking a Data Analyst Internship to solve business problems using data-driven insights.

EDUCATION

CMR University, Bangalore

Bachelor of Engineering in Information Technology

Aug 2023 – May 2027

CGPA: 8.83 / 10.00

Relevant Coursework: Database Management Systems | Machine Learning | Probability & Statistics | Data Mining | Python for Data Science | Artificial Intelligence

TECHNICAL SKILLS

Programming & DBs	SQL (CTEs, Window Functions, Subqueries, JOINS), Python, SQLite, Relational Databases
Data Analysis	EDA, KPI Diagnostics, Statistical Analysis, Feature Engineering, ETL Pipelines, Data Cleaning
Machine Learning	Logistic Regression, Random Forest, XGBoost, SMOTE, GridSearchCV, Cross-Validation, Predictive Modeling
Visualization & BI	Power BI, Tableau, Excel (Pivot Tables, Lookup Functions, Charts), Matplotlib, Seaborn, Dashboard Development
Tools	Git, GitHub, Jupyter Notebook, VS Code, Pandas, NumPy, Scikit-learn

PROJECTS

Customer Churn Prediction – Telecom

GitHub

- Analyzed churn patterns across 7,043 telecom customers using Python and SQL; identified tenure, total charges, and contract type as major churn drivers.
- Built and evaluated Logistic Regression, Random Forest, and XGBoost models using GridSearchCV with 5-fold cross-validation – best model achieved **ROC-AUC: 0.8317**.
- Applied cost-sensitive threshold optimization to improve churn recall to **87.4%**; estimated **~\$18.8K/month** retention uplift under a simulated business scenario.

E-Commerce Shipping KPI Analysis

GitHub

- Investigated a **7.3pt drop** in On-Time Delivery across 99,441 orders using 7 SQL queries (CTEs, Window Functions, 4-table JOINS) on an 8-table database.
- Identified SP state and heavy product categories as primary delay contributors responsible for **65% of delayed deliveries** through SQL-based root cause analysis.
- Built an automated Python ETL pipeline with rolling averages for weekly stakeholder reporting.

Indian Startup Funding Analysis & Prediction

GitHub

- Analyzed 3,000+ startup funding records to identify sector-stage investment trends and investor concentration patterns using Python.
- Built a **3-page interactive Power BI dashboard** for KPI tracking, funding trend analysis, and sector comparisons; trained a Random Forest Regressor to predict funding amounts by industry and stage.

RESEARCH & PUBLICATIONS

ML-Based Customer Churn Prediction in Telecom with Business-Oriented Threshold Optimization

Vasuki Nagesh Naik, Dr. Mallikarjun Kodabagi – *CMR University*

Feb 2026

CICON 2026 | Status: Under Review

EXPERIENCE

Data Analytics Virtual Experience – Deloitte (Forage)

Dec 2025

Built dashboards and performed root cause analysis across simulated forensic datasets using EDA and KPI reporting.

CERTIFICATIONS

Python for Data Analysis – Kaggle

Jun 2025

Data Science Technical Workshop – RemarkSkill (NITK Surathkal)

Mar 2025

Data Fundamentals – IBM

Mar 2026

SQL Intermediate – SoloLearn

Aug 2025

ACTIVITIES

NammaSuraksha 2025 – National Level Hackathon

Apr 2025

Presidency University (Karnataka State Police, Bengaluru) | Prototyped a public safety kiosk for emergency response at transport hubs in a 3-day sprint.
