

Vasuki Nagesh Naik

Bangalore, India | +91 70199 56682 | naikvasuki413@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

Data analytics undergraduate (CGPA: 8.83) who diagnoses business problems using Advanced SQL (CTEs, window functions), KPI dashboards, and statistical modeling. Proficient in Python, SQL, and Power BI. Co-authored ML research on churn prediction (under review at CICON 2026; ROC-AUC 0.8317). Seeking a Data Analyst Internship to turn raw data into decisions that move business metrics.

EDUCATION

CMR University, Bangalore

Bachelor of Engineering in Information Technology

Aug 2023 – May 2027
Current CGPA: 8.83 / 10.00

PROJECTS

Customer Churn Prediction – Telecom Dataset | *Python, Scikit-learn, XGBoost, SMOTE* | [GitHub](#)

- Identified key churn drivers (tenure, total charges, contract type) across 7,043 telecom users through EDA, feature engineering, and permutation importance analysis.
- Evaluated Logistic Regression, Random Forest, and XGBoost using GridSearchCV and 5-fold cross-validation to improve churn prediction accuracy; **Random Forest achieved ROC-AUC 0.8317**.
- Designed profit-based threshold optimization (0.407) raising recall to **87.4%**; estimated potential uplift of **~\$18.8K/month** under a cost-sensitive business scenario.

E-Commerce Shipping KPI Analysis & Root Cause Investigation | *SQL, Python, SQLite, Matplotlib* | [GitHub](#)

- Diagnosed a **7.3pt OTD drop** across 99,441 orders by writing 7 advanced SQL queries (CTEs, window functions, 4-table JOINS) on an 8-table relational database.
- Pinpointed root cause to SP state (15.6% delay) and heavy product categories (20.6% delay); showed that fixing these two segments resolves **65% of all delays**.
- Automated ETL pipeline in Python; surfaced weekly delay patterns via rolling averages and correlation analysis (weight vs. delivery: 0.42) for stakeholder reporting.

Indian Startup Ecosystem – Funding Analysis & Prediction | *Python, Power BI, Machine Learning* | [GitHub](#)

- Revealed that fintech and edtech dominate early-stage funding (Seed–Series A) while manufacturing lags; surfaced top investor concentration patterns across 3,000+ funding records.
- Built a 3-page interactive Power BI dashboard (KPIs, trend charts, sector/investor analysis) and trained a Random Forest Regressor to predict funding amounts by industry and stage.

WORK EXPERIENCE

Data Analytics Simulation – Deloitte (Forage)

Dec 2025

Data Analyst Virtual Experience

- Built an interactive dashboard tracking key business metrics; identified trend anomalies using EDA across multiple datasets to support simulated client advisory decisions.
- Conducted root cause analysis and structured reporting across forensic investigation scenarios.

TECHNICAL SKILLS

SQL & Databases	Advanced SQL (CTEs, window functions, JOINS, aggregations, subqueries), SQLite, ETL, relational databases
Data Analysis	KPI diagnostics, EDA, feature engineering, statistical modeling, business insights
Programming	Python (Pandas, NumPy, Matplotlib, Seaborn)
Machine Learning	Logistic Regression, Random Forest, XGBoost, SMOTE, predictive modeling, model evaluation (ROC-AUC)
Visualization & BI Tools	Power BI, Tableau, Excel, dashboard development, KPI reporting, business intelligence
	Jupyter Notebook, VS Code, Git, GitHub

RESEARCH & PUBLICATIONS

ML-Based Customer Churn Prediction in Telecom with Business-Oriented Threshold Optimization

Feb 2026

Vasuki Nagesh Naik, Dr. Mallikarjun Kodabagi – CMR University | CICON 2026 | Status: Under Review

CERTIFICATIONS & TRAINING

Data Fundamentals – IBM

March 2026

Python for Data Analysis – Kaggle

June 2025

SQL Intermediate – SoloLearn

August 2025

Data Science Technical Workshop – RemarkSkill (NITK Surathkal)

March 2025

ACTIVITIES

NammaSuraksha 2025 – National Level Hackathon

Apr 2025

Presidency University (in collaboration with Karnataka State Police, Bengaluru)

- Prototyped a public safety kiosk enabling instant emergency police contact at transport hubs; completed a 3-day competitive development sprint in a team environment.
