

Vasuki Nagesh Naik

Bangalore, India | +91 70199 56682 | Email | LinkedIn | GitHub | Portfolio

PROFILE SUMMARY

Data-focused IT undergraduate with hands-on experience in **SQL, Python, Power BI, and machine learning**. Engineered ML pipeline on 7,043+ telecom records, achieving **ROC-AUC 0.8317** and projecting **\$18,820/month business uplift** through profit-optimized threshold tuning. Skilled in **EDA, dashboard development, and KPI reporting** — seeking to drive data-informed decisions as a Data Analyst Intern.

EDUCATION

CMR University, Bangalore
Bachelor of Engineering in Information Technology

Aug 2023 – May 2027
Current CGPA: 8.80 / 10.00

PROJECTS

Customer Churn Prediction – Telecom Dataset | *Python, XGBoost, SQL, Scikit-learn, Streamlit* | [GitHub](#)

- Engineered ML pipeline on **7,043 telecom records** (EDA, feature engineering, modeling); benchmarked Logistic Regression, Random Forest, XGBoost — **Random Forest achieved ROC-AUC 0.8317**.
- Identified top churn drivers (tenure, total charges, contract type) via permutation importance; tuned **profit-optimized threshold (0.407)** boosting recall to **87.4%** — projected **\$18,820/month uplift**.
- Deployed interactive prediction interface using **Streamlit** for real-time churn scoring and business scenario testing.

Startup Funding Analysis & BI Dashboard | *Power BI, Python, SQL, Random Forest* | [GitHub](#)

- Analyzed **3,000+ startup funding records** using SQL and Python; surfaced **5 top-funded sectors**, year-on-year growth trends, and investment stage distribution across Seed to PE rounds.
- Designed **3-page interactive Power BI dashboard** (dynamic KPIs, trend decomposition, investor drill-downs) for strategic market analysis — deployed for public access and stakeholder use.
- Developed **Random Forest Regressor** predicting funding amounts by industry and investment type, enabling **data-driven investment scenario planning**.

WORK EXPERIENCE

Data Analytics Virtual Experience | **Deloitte (Forage)**
Professional Job Simulation

Dec 2025

- Conducted EDA and designed interactive dashboards on complex business datasets, identifying anomalous trends and key performance patterns across **3+ business scenarios**.
- Delivered data-driven insights supporting **business decision-making scenarios** and forensic investigation tasks in a professional consulting framework.

TECHNICAL SKILLS

Data Analysis & BI	SQL (JOINS, aggregations, subqueries, window functions), Python (Pandas, NumPy), Power BI , Tableau, Excel, EDA, statistical analysis, feature engineering, KPI dashboards
Machine Learning	Logistic Regression, Random Forest, XGBoost, SMOTE, model evaluation (ROC-AUC, precision, recall), threshold optimization, forecasting
Tools & Deployment	Jupyter Notebook, VS Code, Git, GitHub, Streamlit, relational databases

RESEARCH & PUBLICATIONS

ML-Based Customer Churn Prediction in Telecom with Business-Oriented Threshold Optimization

Feb 2026

Vasuki Nagesh Naik, Dr. Mallikarjun Kodabagi — CMR University

Submitted to: International Conference on Converging Intelligence (CICON 2026) | Status: Under Review

CERTIFICATIONS & TRAINING

Data Fundamentals – IBM	March 2026
Python for Data Analysis – Kaggle	June 2025
SQL Intermediate – SoloLearn	August 2025
Data Science Technical Workshop – RemarkSkill (NITK Surathkal)	March 2025

ACTIVITIES

NammaSuraksha 2025 — National Level Hackathon

Apr 2025

Presidency University (in collaboration with Karnataka State Police, Bengaluru)

- Prototyped a public safety kiosk enabling instant emergency police contact at transport hubs; collaborated in a **3-day competitive sprint** demonstrating rapid problem-solving and cross-functional teamwork.
